(22)Date of filing : 19.01.1999

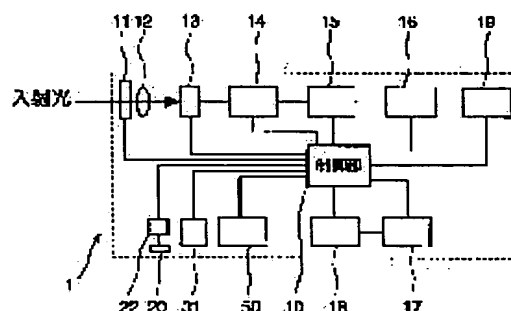

(72)Inventor : TAKABAYASHI NOBUHISA

## (54) DIGITAL CAMERA

## (57)Abstract:

PROBLEM TO BE SOLVED: To provide a digital camera capable of easily and bodily feeling and recognizing the completion of photographing.

SOLUTION: When a piezoelectric element 31 is vibrated, the vibration is transmitted to a shutter button 20 and the shutter button 20 is vibrated. A user recognizes that the conversion of light from an object to electric signals is completed, that is the photographing is completed, by the vibration of the shutter button 20. In the case of photographing, since the user touches the shutter button 20, the user surely recognizes the completion of the photographing. Thus, since the user is prevented from moving this digital camera 1 before completing the photographing, camera shakes and the photographing of unintended images are prevented.

## LEGAL STATUS

[Date of request for examination]

19.03.2003

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
